NAME

mv - move (rename) files

SYNOPSIS

```
mv [OPTION]... [-T] SOURCE DEST
mv [OPTION]... SOURCE... DIRECTORY
mv [OPTION]... -t DIRECTORY SOURCE...
```

DESCRIPTION

Rename SOURCE to DEST, or move SOURCE(s) to DIRECTORY.

Mandatory arguments to long options are mandatory for short options too.

--backup[=CONTROL]

make a backup of each existing destination file

-b like --backup but does not accept an argument

-f, --force

do not prompt before overwriting

-i, --interactive

prompt before overwrite

-n, --no-clobber

do not overwrite an existing file

If you specify more than one of $-\mathbf{i}$, $-\mathbf{f}$, $-\mathbf{n}$, only the final one takes effect.

--strip-trailing-slashes

remove any trailing slashes from each SOURCE argument

-S, --suffix=SUFFIX

override the usual backup suffix

-t, --target-directory=DIRECTORY

move all SOURCE arguments into DIRECTORY

-T, --no-target-directory

treat DEST as a normal file

-u, --update

move only when the SOURCE file is newer than the destination file or when the destination file is missing

-v, --verbose

explain what is being done

-Z, --context

set SELinux security context of destination file to default type

--help display this help and exit

--version

output version information and exit

The backup suffix is '~', unless set with **—-suffix** or SIMPLE_BACKUP_SUFFIX. The version control method may be selected via the **—-backup** option or through the VERSION_CONTROL environment variable. Here are the values:

```
none, off
```

never make backups (even if --backup is given)

numbered, t

make numbered backups

```
existing, nil
numbered if numbered backups exist, simple otherwise
simple, never
always make simple backups
```
